Personalising Learning and Supporting Learner Agency using Assistive Technology

Thursday 16 September 2021 3:30-4:30 PM

Registered via: <https://attendee.gotowebinar.com/rt/4099609785759091981>

After registering, you will receive a confirmation email containing information about joining the webinar.

This one-hour **webinar** will be of value to all educators. It will cover strategies for personalising learning and supporting learner agency using educational technology, to meet the diverse learning needs of every classroom.

Creating learning environments that accommodate, foster and challenge ALL learners, regardless of the barriers that currently exist for them around the literacy demands of school, is an essential requirement for schools.

This session will introduce core understandings and practical strategies using digital tools to promote learner agency, support active learners and enable their busy educators to personalise learning opportunities.
